Supporting Students, Families and Schools as Schools Restart

Sharon Hoover, PhD, Professor

National Center for School Mental Health (NCSMH), Co-Director
National Center for Safe Supportive Schools (NCS3), Director

@drsharonhoover @NCSMHTweets @NCS3tweets

BHIPP Resilience Break
August 2021
Learning Objectives

1 – Participants will be able to identify at least 3 behavioral health challenges impacting child and adolescent schooling during COVID-19.

2 – Participants will be able to identify at least 3 strategies for supporting student behavioral health as they restart the 2021-21 academic year in the context of the pandemic.

3 – Participants will be able to identify at least 3 ways to partner with schools to support student behavioral health.
National Center for School Mental Health (NCSMH)

- Established in 1995 with funding from the US Department of Health and Human Services (HHS), Health Resources and Services Administration.

- The **NCSMH mission** is to strengthen policies and programs in school mental health to improve learning and promote success for America's youth.

Visit the NCSMH website at [www.schoolmentalhealth.org](http://www.schoolmentalhealth.org)
Our Mission

Provide states, districts, and schools with the knowledge and tools to implement culturally responsive, trauma-informed policies and practices that promote equity and well-being.
Partly hidden by isolation, many of the nation’s schoolchildren struggle with mental health
Mental health challenges are rising

• Mental health-related emergency department visits are up 24% for children (age 5-11) and 31% for youth (age 12-17).

• Twenty-two percent of parents report their child’s mental health or emotional health is worse than before the pandemic.

https://www.cdc.gov/mmwr/volumes/69/wr/mm6945a3.htm
https://www.cdc.gov/mmwr/volumes/70/wr/mm7011a1.htm?s_cid=mm7011a1_w
Parenting Stress and COVID-19

• Parents report significantly higher levels of stress related to COVID than non-parents

• Over 70% of parents report distance learning for children is a source of stress

• Additional significant sources of stress for parents include:
  • basic needs
  • health care services
  • missing major milestones

APA (2020)
How Do Caregivers Feel School is Going for Their Children?

I am a working mother and feel constantly like I am being asked to choose between my child and my career. There is no choice because without my income we lose our home. I am a strong person, but I am begging for help. (West Virginia)

Students receiving special education services are being left behind. (New Jersey)

The teachers are and have been amazing. I just wish there were two of me. (Massachusetts)

<table>
<thead>
<tr>
<th>#</th>
<th>Issue</th>
<th>Quote</th>
</tr>
</thead>
<tbody>
<tr>
<td>#1</td>
<td>Balancing School and Work (Time)</td>
<td>One of my kids is fine academically, but is extremely challenged by the lack of social interaction. Another one of my kids is requiring all of my time during the day to stay on task. And a third child is suffering because she has nothing to do because school hasn’t started for her, so she is watching way too much TV because I can’t do everything. (Oregon)</td>
</tr>
<tr>
<td>#2</td>
<td>Meeting Special Education Needs</td>
<td>My son is nonverbal and this has not been taken into consideration at all and he is not receiving his speech and occupational therapy. (Texas)</td>
</tr>
<tr>
<td>#3</td>
<td>Navigating Platforms</td>
<td>I have to take pictures of school work on my phone, send it to a school email, upload the images and then send them to the teacher. I waste lots of time waiting on the computer to load videos. I just don’t feel like my child is learning much despite the best efforts of teachers. She learns better in person with a variety of teachers for motivation. (West Virginia)</td>
</tr>
<tr>
<td>#4</td>
<td>Support from School/Teachers</td>
<td>The teachers and supports are stretched so thin between virtual and in-person classrooms. I don’t see the same level of support and communication as pre-covid. (Texas)</td>
</tr>

</table>
Educator Mental Health
“I spend all day staring at a screen and kind of generating enthusiasm into the void that Zoom is, and I end the day so tired, and so done, and so frustrated. The moments of joy I used to have are so much more rare.”
Where do we go from here?
Anxiety/Fear/Stress
Loss
Inequities

Hope and Resilience
Behavioral health challenges impacting child and adolescent schooling during COVID-19
Stressors Related to COVID-19
ANXIETY/FEAR/STRESS

• Increased challenges with mental health issues (*e.g.* anxiety, depression)
• Confusion and uncertainty about what will happen next
• Worry and fear for the safety of self and others (*for teachers, worry about their students*)
• Anxiety related to unknowns, new ways of operating as the 2020-21 school year begins
• Fears associated with re-opening schools and COVID-19 transmission
• Unsafe situations at home (*e.g.*, abuse, neglect, domestic violence)

Citation: National Center for Safe Supportive Learning Environments, 2020
Stressors Related to COVID-19
LOSS

• Loss of resources (e.g., extended family support, job loss, access to mental health services and health care)
• Loss of family members, community members, teachers, and students
• Students and staff missing out on important rituals and transitions (e.g., prom, graduation, end-of-year celebrations and goodbyes, losses)
• Sudden disruption of normal routines, relationships, structures, and predictability
• Food and housing insecurity

Citation: National Center for Safe Supportive Learning Environments, 2020
Stressors Related to COVID-19

EQUITY

• The disproportionate effects of COVID-19 in communities of color and increased risk for these and other stressors

• Disproportionate access to virtual education for students (e.g., technology, learning challenges)

Citation: National Center for Safe Supportive Learning Environments, 2020
• Past pandemics were associated with increases in depression, anxiety, stigma, and shaming.

• Longitudinal negative impacts of other large-scale community crises (e.g., natural disasters) on children’s behavioral health and academic functioning.

Citations:
Strategies for supporting children as schools restart
UNIVERSAL Strategies

- Supportive, inclusive, positive school climate
- Culturally responsive policies and practices
- Trauma responsive policies and practices
- Staff wellness
- Social Emotional Learning (SEL)
- Crisis preparedness
- Mental health literacy for school staff and students
What Kids Need (age doesn’t matter)

• To feel loved and protected
• To understand
• To know their feelings
• To feel capable
Social and Emotional Strategies
Universal Strategies

• “Encourage reassurance, routines, regulation”

• Translation of existing Tier 1 strategies
  • SEL in virtual classes/home

• Daily-weekly check-ins
Closegap: Daily Check-ins (Closegap.org)

*Students do a daily emotional check-in*

Teachers and Parents get Info in Real Time

*Students connect with an adult or participate in self-guided activities*
PSYCHOLOGICAL FIRST AID:
Listen Protect Connect/Model and Teach

Screening in Schools

• Impact of COVID-19
  • COVID-19 Adolescent Symptom & Psychological Experience Questionnaire (CASPE)
  • Epidemic Pandemic Impacts Inventory (EPII)
  • DERS for Coronavirus Pandemic
  • Coronavirus Impact Scale
• Life Satisfaction/Subjective Well-being
• Psychological distress/Symptomatology
• Positive Functioning
• School Factors
• Social Determinants of Health
Screen for strengths
https://www.covitalityucsb.info/
and consider trauma-informed assessment:
Early Intervention and Treatment in Schools

- Evidence-based psychosocial interventions — e.g., CBITS/Bounce Back, TF-CBT
- Psychiatric care

Tier I. All Students
Regardless of behavioral health risk

Tier II. Some Students
At risk for behavioral health concerns

Tier III. Few Students
Apparent behavioral health needs

1. Realize
2. Recognize
3. Respond
4. Resist

- SSET
- STRONG
- PFA/PREPaRE
- SEL
- MH Literacy
- Staff Wellness
- School-wide ecological strategies

TF-CBT
Bounce Back (K–5)
CBITS (6–12)

Sharon Hoover, 2018
Youth are 6x more likely to complete mental health treatment in schools than in community settings (Jaycox et al., 2010)
CBITS developed to help children in schools cope with trauma
NOW – Tier 2/3 Strategies

• Online interventions
  • Individual
  • Family
  • Group
CBITS Online Live

Session 1: Introduction, Orientation, and Rationale
Session 2: Psychoeducation and Relaxation
Session 3: Thoughts and Feelings
Session 4: H.O.T. Seat
Session 5: Social Problem-Solving
Session 6: Moving-Up Ceremony

Partnering with Schools to Support Student Behavioral Health

Universal supports
Patient-specific supports
Universal Supports

• Provide recommendations on policies and procedures to schools and districts that will promote a safe return to school

• Support teachers
  • Consultation on how to identify concerns, conduct screening, triage students
  • Host a virtual “Ask a doctor” session for parents
  • Virtual classroom visits to teach kids about hand hygiene, wearing masks, distancing, etc
  • Provide a list of mental health providers and child/adolescent psychiatrists in the community
    • Search for clinicians who specialize in child/adolescent and family therapy
    • Indicate which insurance plans providers accept
    • Determine the length of wait lists
  • Create "quick guides" with indicators of mental health difficulties (e.g., anxiety and depressive symptoms), discuss potential screening options, and how to access services within the school or local community
Questions to ask local districts/schools of patients:

• What are schools'/districts' plans for the upcoming school year? (e.g., virtual, hybrid, or in-person learning)

• What resources and supports will they offer for students' social, emotional, and behavioral wellbeing?
  • Does the school have a social-emotional curriculum? Will this program continue in the fall?
  • Are there mental health providers within the school? Will they have the capacity to continue work with students? How will students and families access these services?

• What are ways that I can partner with schools to expand upon existing resources and offer additional support to schools, students, and families?
Patient-specific supports

• Support re-establishing routines

• Provide education to families about distance learning strategies, including special education rights/accommodations in distance learning
  • https://www.nasdse.org/docs/NASDSE_LRE.pdf

• Encourage families to connect with school mental health supports

• Communicate with school personnel about student progress/concerns

• Screen students and families for COVID impact and general well-being
**Back to Basics:**

- **Routines** can help everyone stay in touch and reduce stress. If the ones you have in place are working, stick to them, if not create new ones for this special time.

- **Basic hygiene routines**: brush teeth, change out of pajamas, hair

- **Sleep routines**. Sleep schedules may have shifted during the summer (especially for teens!). Review sleep hygiene principles, troubleshoot common causes for late bedtimes, and establish a bedtime routine.
Behavioral Activation
Staying “SAFE”

Social
- call friends, play games with family

Active
- dance, walk/run/ride bikes, do YouTube exercises

Fun
- choose an activity you enjoy - read, puzzles, board games

Effortful
- chores, schoolwork, make dinner, clean
Remind parents: Ask for help when needed

You can't do it all! Ask for help if struggling to explain a new concept

Virtual learning resources (Kahn academy)

Small groups via Zoom

Coaches / tutor available virtually

Reward effort!!!

- Parents should NOT gage their own daily “success” based on child’s outcomes (work completion, grades, etc.)
- Instead, measure your success by looking out how you interacted with your child (provide positive praise, ignore negative behaviors, validate feelings)
Back to School Anxiety During COVID

- Validate their feelings
- Set the tone
- Help them think positive
- Practice separating
- Have a routine
- Emphasize safety measures
- Encourage flexibility
- Seek help as needed

https://childmind.org/article/back-to-school-anxiety-during-covid/
Is this a normal reaction to COVID or is it more?
Warning Signs for Depression

- Social withdrawal; isolation
- High emotional reactivity / anger to limits / expectations
- Increase self criticism and overaction to criticism
- Drop-in activities, loss of interest
- Talking about death, interest in death, wanting to be dead
- Increased tendency to shut down
## How to Ask About Mood

<table>
<thead>
<tr>
<th>Chose the right time</th>
<th>Do not engage immediately after an argument/disagreement or when in the middle of fun task</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stick to the facts</td>
<td>Tell them specific behaviors you find concerning, ask if they have noticed behaviors</td>
</tr>
<tr>
<td>Validate</td>
<td>Let them know how hard things have been lately, express concern for their well-being</td>
</tr>
<tr>
<td>Self-disclose</td>
<td>Sharing can be a powerful tool</td>
</tr>
<tr>
<td>Ready for push-back</td>
<td>Conversation may go poorly or not</td>
</tr>
</tbody>
</table>
Screening questions to ask patients/families

• Since COVID and school closures:
  • What has been the most difficult for your family?
  • What positive opportunities, if any, have arisen for your family?
  • Have any of your family or community members become ill or died from COVID?
  • Have you had any job loss or financial loss?
  • Have you had any trouble with food or housing?

• How will your child be returning to school (in-person, hybrid, distance)?
  • How did distance learning go for you/your child in the Spring? Did you learn anything that could be helpful now?
  • How do you/your child feel about this year’s school plan? Do you have any specific concerns? Anything you are looking forward to?
Screeners to incorporate in visits

- Pediatric Symptoms Checklist (PSC-17)-General Emotional and Behavioral Concerns
- Strengths and Difficulties Questionnaire (SDQ)-General Emotional and Behavioral Concerns, includes assessment of strengths
- Behavioral Health Checklist (BHCL)
- Patient Health Questionnaire-Modified for Teen (PHQ-9-M)-Brief Depression Screener for Adolescents
